

[Supporting Software]

NovaLCT V5.4.2 or later

[New Features]

1. Added the feature to accelerate the sending of calibration coefficients.
2. Added the device model customization feature.

[Improvements]

1. Enhanced source compatibility.
2. Optimized PHY configuration.
3. Optimized the dehumidification feature.
4. Optimized the Ethernet port load capacity to address insufficient capacity issues in certain routing setups.

[Changes]

[Bug Fixes]

1. Fixed the issue where the device cascade ID could not be saved.
2. Fixed the issue where NovaLCT reports errors after authorization removal.

[Notes]

None.
